Your Solution For Accurate Starter Fertilizer Placement

Check-valve keeps lines from draining at the end of the field.

Can easily be adjusted for both depth of fertilizer placement and distance from seed.

Easily mounts to row units on John Deere, Kinze, Great Plains, White and Case-IH planters

Sunco's unique design allows discs to be pulled thru the field which improves planter tracking, reduces bearing and disc fatigue, plus eliminates stress on parallel linkage.

Because Nutri Mate 3™ is mounted to the row unit, the planter parallel links let it float and the unit gauge wheels provide depth control so nutrients are precisely placed in relation to the seed.

Bolt on blades, standard equipment

Notched disc leads smaller diameter smooth disc to allow soil penetration even in the highest trash conditions while still forming groove for fertilizer placement.

Inside scraper

◆ A unit developed to precisely place fertilizer in correct proximity to seed, reduce germination problems and encourage rapid plant growth

◆ Works well in all farming operations including conventional, no-till, strip-till and minimum-till

Nutri Mate 3™ available for Case-IH Planters

The Time to Apply Nitrogen is When You Plant

Exclusive features put **NutriMate 3™** in a class by itself!

Heavy duty hub and bearing provide for dependable, long-lasting service.

Fertilizer Placement

Distance

- 2" from seed
- 2 7/8" from seed
- 3 3/4" from seed

Depth Adjustments

- 1/2" above seed
- 1/2" below seed
- 1" below seed

Discs are pulled and not pushed - improving performance.

Exclusive maintenance-free 10°

pivot allows **NutriMate 3™** to flex independently of planter row unit.

(notched disc removed)

- ◆ Inside scraper prevents material build-up between blades
- ◆ The delivery tube, which is easy and inexpensive to replace and resists plugging, places fertilizer in the bottom of the soil opening
- ◆ Narrow double disc design reduces the amount of soil disturbed

With Sunco's optional **Saber Tooth** Trash Discs, trash is removed prior to placing fertilizer with the **NutriMate 3™**.

NutriMate 3™ will not only supply plants with starter fertilizer for immediate and vigorous emergence, but adequate amounts of nutrient can be applied to sustain plants during their yield-producing growth.

Specifications and Standard Equipment

Weight - 45 lbs.
 Distance from face plate - 15"
 w/Sunco Saber Tooth Row Cleaner - 22.5"
 Disc size: 13.5" Notched
 12" Smooth
 4 P.S.I. check valve
 Heavy duty Inside scraper
 Bolt on hub-blade assemblies
 Saber Tooth receiver tube
